

# 2nd JOINT DUTCH-IFT SCHOOL ON THEORETICAL PHYSICS

## Useful Information

### 1 General Information

São Paulo is a very big city and as any other big city in the world, it's very easy to get lost or to have trouble finding nice places to go. Even though it seems like a huge mess, you'll soon find yourself understanding how to manage it. Below you'll find some informations for you to have a nice time here.

The new building of IFT (weeks 1 and 3) is located near one of the main public transport terminal of city, the Barra Funda Terminal. It means that almost any place in the city can be reached easily from it, including hotel Intercity and the old location of IFT. The old IFT (2nd week) is near one of the most important avenues of the city, Avenida Paulista. Its neighborhood is called Bela Vista and the other side of Paulista Avenue is called Jardins. This avenue is the very business and cultural heart of São Paulo and that's why you may find so many interesting options for eating or hanging out. Another good option is Parque do Ibirapuera which is a 30 minute walk from Avenida Paulista and is the biggest park in the city. There is also a modern art museum MASP on 1578 Avenida Paulista.

At the reception desk of the Hotel you'll find a nice map with some more indications of where to go.

### 2 TIPS

- International Calling: Hotel charges are certainly high for international calls, but you may buy cards in some newsstands located at Avenida Paulista or in Post Offices.

Another option to call from Brazil to abroad is to use a service offered by EMBRATEL (a Brazilian phone enterprise), called Call Home Direct. With Call Home Direct, the phone calls made here are charged in your own country, to the destination number or to a phone card of the international operators. Just ring the Call Home Direct number via Embratel corresponding to the destination country. Access to service is free of charge through public, wireline and cellular phones. Here is a list of some country codes (if your country doesn't appear in the list, see
